## About this Guide

So, you're looking to upgrade your version of Bp Premier from LAVA SP3 to the latest SAFFRON release? This Guide has been developed to help make the transition as smooth and as seamless as possible. We've put this together as a useful summary of the key information you need to know about what has changed between your current version of the software and SAFFRON.

## Legend

For ease of use, release information has been categorised under the following groupings to help you to identify the nature of the content. We've also included links to various resources throughout the Guide that will provide you with more information about the feature, function or workflow described.

Using the legend below, you can tell at a glance the nature of the release information and what type of resources are available on a particular topic.

Icon	Description
<b>Release Information</b>	
	<ul style="list-style-type: none"> <li><b>Workflows changes</b> Major workflow changes that, in many cases, must be incorporated or at least considered once using new version.</li> </ul>
	<ul style="list-style-type: none"> <li><b>Watch-outs for staff</b> Not necessarily a change of workflow but things that might throw staff off, such as warnings or new prompts that should be addressed in staff education.</li> </ul>
	<ul style="list-style-type: none"> <li><b>Quick wins</b> New features or updates that require little change management to incorporate - some nice added bonuses</li> </ul>
	<ul style="list-style-type: none"> <li><b>Long term benefits</b> New features or updates that offer significant strategic and/or procedural benefit but would likely require planned changed process</li> </ul>
